RESEARCH VEHICLE

MTCcorp has the Engineering and Manufacturing expertise to deliver large and complex programs as well as small component projects

Our company continues to invest in our people, processes, and equipment. We are a vertically integrated 'one-stop shop', so we can provide shorter lead-times, competitive pricing and deliver high quality products to all our customers on-time.

CAPABILITIES

MTCcorp leverages its world-class DNA, manufacturing know-how, and attention-to-detail in its pursuit of excellence in low-volume production of high-quality, precision components in 3 areas of core competencies:

- **CNC-Machining**

Metallic and Non-Metallic substrates. Large size and complex geometry.

- **Advanced Composites**

Carbon graphite, glass or Kevlar fibers, typically woven into fabric, impregnated with a resin matrix, and then cured to exhibit high-strength and light weight.

- **Transparencies**

Precision Formed and tempered glass windows for Aircraft and Spacecraft.

Innovative Solutions

MTCcorp has a long history of innovating and crafting unique solutions for designing, engineering, executing, testing and delivering solutions that meet or exceed OEM quality.

Mission-Critical Complex Assemblies

Our capabilities include low-volume specialty production, including CNC-machined parts, weldment parts, resin-transfer molded composite parts, full paint, program management, outside vendor management, final assembly, first article and non-destructive testing and document control including a deliverable compilation of all mill certs, part travelers, test reports and certificates of conformance.

Many Modalities, A Singular Focus

Whether we are designing tooling, executing a Proof-of-Concept build, or developing autonomous vehicles for air, land or sea, we approach every project with passion and are driven to achieve excellence.

**BATTLEFIELD AIRBORNE COMMUNICATION
NODE (BACN) EQUIPMENT RACKS**

EQUIPMENT LIST OVERVIEW

TEMPERATURE CONTROLLED ENCLOSURES

With over 120,000 square feet of production and facility space, MTCcorp has cutting-edge production, fabrication and inspection capabilities that include:

- Precision CNC Machining and Inspection
- Advanced Composites Fabrication
- Metal Forming and Fabrication
- Glass Machining, Forming and Tempering

MACHINING

Type

5-Axis CNC Mill
5-Axis CNC Mill
5-Axis CNC Mill
3-Axis CNC Mill
3+2 Axis CNC Mill

Make and Model

Zimmermann FZ37 Climate Controlled
Zimmermann FZ33 Climate Controlled
Zimmermann FZ32 Climate Controlled
Fadal (2)
Fidia K165

Work Envelope

216" x 135" x 59"
157" x 118" x 59"
236" x 118" x 59"
60" x 30" x 30"
39" x 23" x 19"

INSPECTION

Laser Tracker
Portable CMM Arm

Leica Absolute Tracker AT-901 MR
API Baces Axxis-6 C123 2.6m

250 ft radius
8 ft radius

COMPOSITES FABRICATION

Autoclave
Binks Curing Oven
Composites Lamination Rooms
CNC Cutting Table

Climate Controlled
Eastman S135

10 ft. dia x 20 ft. L
8' x 10' x 8'
20' x 50' 13' x 34'
72" x 16'

TRANSPARENCIES PRODUCTION

Bend and Temper Furnace
Bending Furnace
3-4 Axis CNC Machining Center
Inspection Room

Ianua BTF/1
Glass Robots MB-FBA 180/290/80-2
CMS - Brembana Speed MB 24
Climate Controlled

35" x 59" x 8"
72" x 116" x 24"
149" x 68" x 16"
25' x 12'

METAL FORMING

Hydraulic Stamping Press
Roll-Former
Press Brake / Bump Former
Metal-Worker / Power Hammer

Lake Erie Engineering
Webb
Bettenbender
Pullmax

115" x 125" Platen
8' wide, 7" dia. rolls
14' wide
42" throat (various)

METAL CUTTING

Water Jet
Power Shear
Band Saws

OMAX
Amada
Various Vert. & Horiz.

60" x 120" x 6"
10' x 1"

METAL FABRICATION

Surface Plates
Fabrication Table

Various
Demmeler - Bluco

12' x 20'
5' x 10'

PROGRAMS

LOCKHEED MARTIN X-59 QUESST COCKPIT SIDE WINDOWS

MACHINING

F-22 Stealth Fighter

Client : PPG Aerospace

MTCcorp manufactured tooling for the canopy on the F-22 Stealth Fighter system.

TRANSPARENCIES

Boeing 787 Dreamliner

Client : PPG Aerospace

MTCcorp manufactures the Face ply glass for B-787 cockpit windows. Hundreds of parts are shipped yearly.

COMPOSITES

Embraer Phenom 300

Client : Embraer

MTCcorp provided engineering, development, tool design and manufacture for carbon fiber seat components. MTCcorp also manufactures the carbon fiber parts. Thousands of parts are shipped yearly.

INTEGRATION

NASA X56A

Client : Lockheed Martin

MTCcorp was commissioned by Lockheed Martin to build two complete X-56a Experimental Aircraft for NASA.

PROGRAMS

SIKORSKY VH-92 'MARINE ONE' COMPOSITE COCKPIT SIDE WINDOW FRAMES

MACHINING

High Precision Large Format 5-Axis Machined Parts

Client : Commercial Aviation

MTCcorp is the provider of precision machining of large structural flight parts and tooling for commercial and military aerospace programs.

TRANSPARENCIES

Landing Light Lens

Client : Embraer

MTCcorp manufactures Landing Light Lenses for Embraer 170 & 190 Aircraft. Hundreds of parts shipped yearly.

COMPOSITES

PPG Straps

Client : PPG

MTCcorp provides autoclave-cured prepreg fiberglass straps that are part of a laminated aircraft window assembly used to attach and insulate the transparency from its outerframe. 150 + p/n's, thousands of parts shipped yearly.

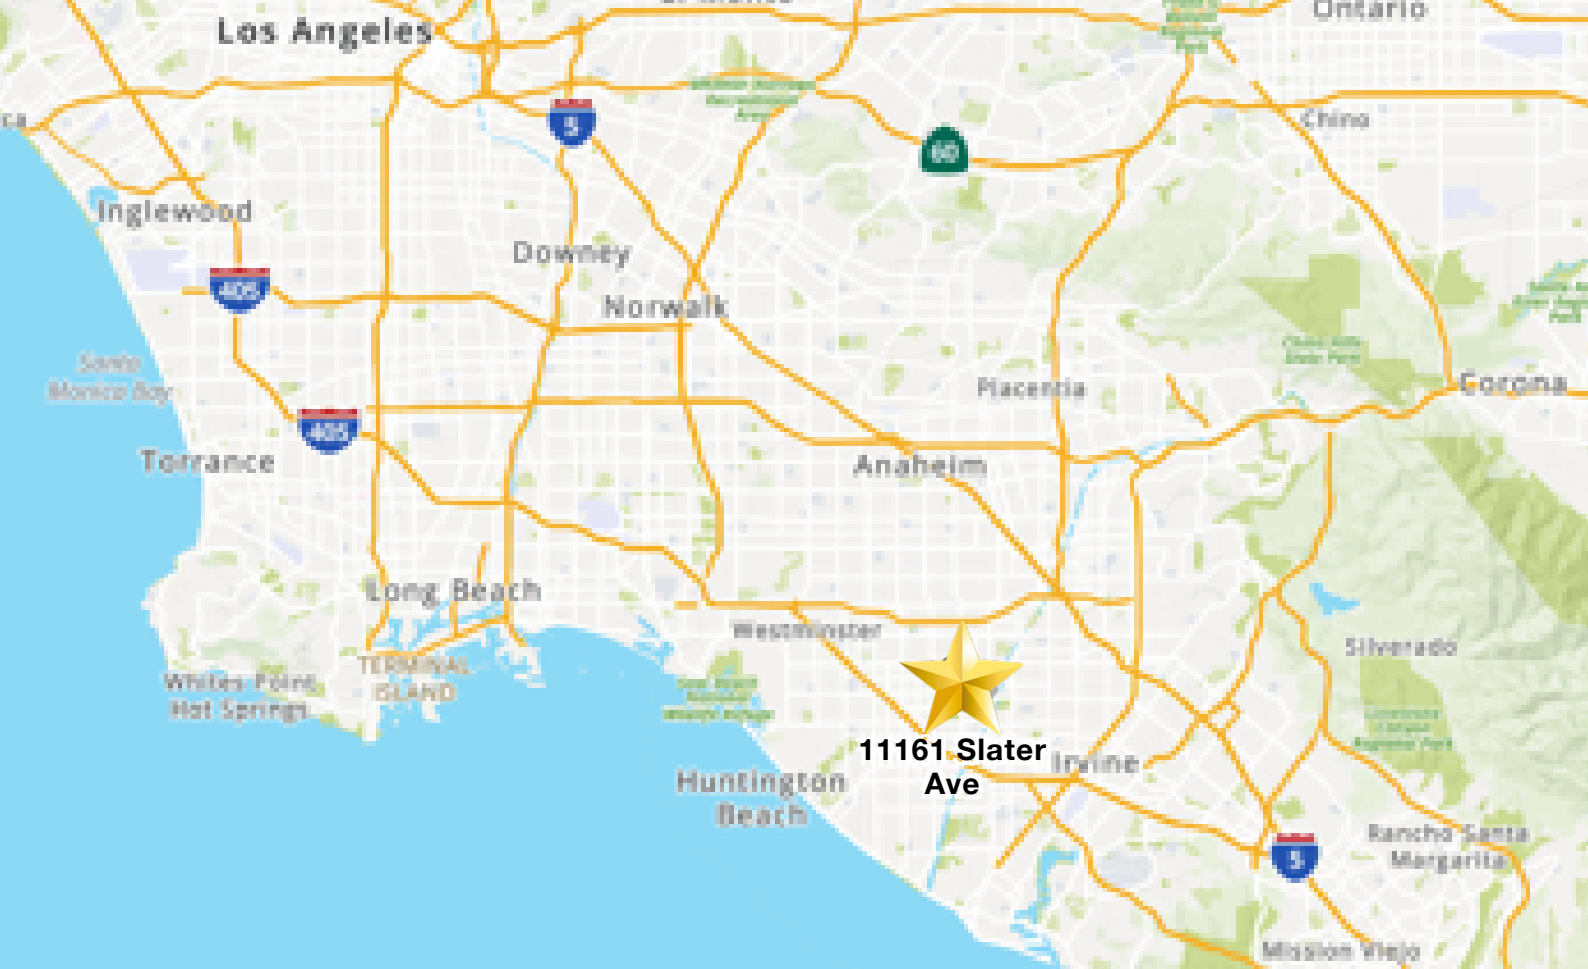

INTEGRATION

BACN Equipment Racks

Client : Northrop Grumman

MTCcorp was engaged to conceptualize and engineer mission critical equipment racks for the Battlefield Airborne Communication Node (BACN) Network. Hundreds of parts shipped to date.
